

Statement from Timothy Glidden, APRN-CRNA, APRN Board Chair:

I believe the regulations to practice, in place for all APRN's are very effective. These regulations allow for definitions of scope of practice for each, separate APRN Specialty. The regulations allow for ease in monitoring, advising, and disciplining when needed. The regulations put in place measures of safety for the public, as well as guidance to the practitioner. The current regulations allow for maximum scope of practice within each APRN subset of skill. The regulations also ensure proper licensure and maintenance of continuing educational requirements.
